### FINANCIAL INDICATOR REVIEW

(Based on 2015 Financial Information Return)

Tweed M (Hastings Co)

#### NOTES

Financial Information Returns ("FIRs") are a standard set of year-end reports submitted by municipalities to the Province which capture certain financial information. On an annual basis, Ministry staff prepare certain financial indicators for each municipality, based on the information contained in the FIRs. It is important to remember that these financial indicators provide a snapshot at a particular moment in time and should not be considered in isolation, but supported with other relevant information sources. In keeping with our Financial Information Return review process and follow-up, Ministry staff may routinely contact and discuss this information with municipal officials.

#### Additional Notes on what Financial Indicators may indicate:

Net Financial Assets or Net Debt as a % of Own Purpose Taxation Plus User Fees - How much tax and fee revenue is servicing debt?

**Reserves and Reserve Funds as a % of Operating Expenses -** How much money is set aside for future needs / contingencies?

Debt Charges as a % of Total Operating Revenue - How much of each dollar raised is spent on debt?

Total Taxes Receivable less Allowance for Uncollectables as a % of Total Taxes Levied - How much of the taxes billed are not collected.

**Total Cash and Cash Equivalents as a % of Operating Expenses** - How much cash and liquid investments could be available to cover operating expenses?

**Net Working Capital as a % of Total Municipal Operating Expenses** - How much cash, receivables and inventory less short-term debt could be available to cover operating expenses?

**Asset Consumption Ratio** - (expressed as a percentage) measures the age of a municipality's physical assets. It measures the extent to which depreciable assets have been consumed by comparing the amount of the assets that have been used up and their cost.

< 25% - Relatively NEW Infrastructure 26% to 50% - Moderately NEW Infrastructure 51% to 75% - Moderately OLD Infrastructure >75% - OLD Infrastructure

\* In 2016, the indicator Net Book Value of Capital Assets as a % of Cost of Capital Assets (NBV) has been replaced by the indicator Asset Consumption Ratio. Asset Consumption Ratio is an indicator of asset consumption which is the reverse of the previous NBV indicator, which measured remaining life.
